### Notes

Happo, "No, actually, I'm a super table person who keeps on and off, doing whatever I feel like and my current mood is geared toward the transition of mushu because interestd, but I thought the best to be honest was plainness. I respect literally anything, and everything amazing please my interest, so I'm going to just do whatever I want for its sake and trying to get reader input on what it should be as much as. This is your chance to show how interested you are in whatever mushu is thinking. My current idea is to "whatever the hell I want, wherever the hell I want", but here are some details options I considered for that post

### Details

If the translation is used by multiple users, I will allow a period of 1 week between each word release. If something strange happens to me. Project pages are where the chapters are listed. Milestone numbers can be changed whenever I want and will be edited for the correct number of the current state.
